- Design Patterns

RELEVANT EXPERIENCE

Frontend Developer - STC

August 2021 - Current

Saudi Telecom Company

- Build STC Common library infrastructure which is built using Angular NX and Angular Workspace.
- Build V1 of the library to make developing company systems easier for developers.
- Split each section of the library as modules to be easily imported by developers when needed.
- Build STC Common V2 to enhance lib usage and code structure.
- Make V2 usage even easier for developers.
- Develop and add features to SSMS (Safe Guard and Security Management System) like:
 - Develop employees' profiles setup

- Develop employee profile details which contain all employee details like vacations, expenses, allowances, and medical insurance etc.
- Build VMS (Vehicle Management System) to help employees and officials to keep track of car rentals, contracts, violations, plate numbers, and customer needs etc.
- Build STC ChatGPT by Angular which is fed by STC data.
- Take charge of urgent/quick projects that need to be delivered ASAP.
- Manage tasks between my team using Trello to make development process faster.

Mobile Developer

20th of Oct 2020 – 28th of Oct 2020

Radio Rotblau App (FC Basel) - 

- Created a single page radio app with Ionic and Angular for a swiss startup company.
- Made the app work on Android as well as IOS.
- Used a third party library called Howler to make use of the native mobile sound API

Java Instructor

Feb 2020

Class located in October for MUST University – Faculty of Engineering

- Helped students by giving guidance on how to use Java.
- Taught Object-Oriented programming concepts.
- Helped students creating requested researches step by step.
- Kept in touch with students whether on phone or online.

Technical Support Engineer

August 2019 – August 2021

WE – Telecom Egypt

- Take ownership of customer issues reported and take the appropriate resolution.
- Research, diagnose, troubleshoot, and identify solutions to resolve customer issues.
- Perform visits at customer side to fix all network related issue.
- Configure and install FTTH (Fiber to the Home) as well as VDSL at customer side.

Side web app projects

Company Landing Page - 

- Designed and created a frontend landing page that can be used by business companies.
- Included moving Carousel and testimonial sections to make the site more interactive.
- Made the site responsive on all devices using media queries.

Meetups with Nextjs - 

- Created a project about meetups using Nextjs and linked it to MongoDB.
- Made a “add a meetup” feature to create a meetup on MongoDB.
- Fetch latest data from MongoDB and display it using ‘getStaticProps’.

MERN Stack Blog - 

- Created a blog post that has the ability to write a complete article with or without images.
- Used Reacjs to create the pages and Context API to track the user state like logged in or not.
- Used Nodejs to create the server and its paths url’s to communicate with MongoDB.
- Used MongoDB as the database to store or fetch data from.

Angular and React Task Tracker - 

- Created an app to track the daily tasks of the user.
- App is created by both Angular and React and it works the same way.
- App is using a fake backend “JSON-server” to implement CRUD operations.

CERTIFICATIONS & ACTIVITIES

Suez Company for Oil (Suco)

8th of July 2018 - 19th of July 2018

- Completion certificate of summer training with excellent grade.
- Learned how to deal with other developers as well as backend developers.
- Converted an existing PDF template into an interactive UI using HTML & CSS.
- Learned how to separate concerns when debugging.

GDG – Google Developers Group

2017

- Participated as a Google developer with GDG team.
- Attended courses and sessions on how to be proficient in frontend development.

Intel – Technology Innovation and Entrepreneurship Center

2019

- Completion certificate from Intel.
- Learned how to start planning for a project from scratch with the available tools.
- Marketed a tiny project made by us with minimum tools and sold it.

Volunteer at Resala for Charity

2014

- Worked as a member on Resala team transferring food to poor areas.

RELEVANT SKILLS

- Fluent in English
- Watching tutorials
- Reading in English
- Ability to grasp info quickly
- Brainstorming to find the right info and take the right resolution
- Keen to learn new technologies
